Professional Experience

Software Engineer | Zalando

Full-time · Berlin, Germany

Aug 2024 – present (1y 8m)

Fulfillment Offering Team

- **Technical Leadership:** Led end-to-end technical design of a complex customer-facing delivery initiative across 4 departments and 7 teams, translating ambiguous product goals into execution-ready plans
- **Architecture:** Redesigned a critical distributed component by replacing a standalone service with a shared library, eliminating network dependencies, reduce operational risk, and lowering cloud costs
- **Backend Systems:** Built and operated backend services aggregating delivery options and time guarantees (Kotlin, Spring Boot, AWS, Kafka)
- **Cross-Team Alignment:** Coordinated with external teams to unblock a high-priority product experiment
- **Operational Excellence:** Chaired department-wide operational reviews, raising standards for incident analysis, alerting, and remediation

Software Engineer | Tinkoff Bank

Full-time · Almaty, Kazakhstan

Nov 2021 – Jul 2024 (2y 9m)

Transaction Processing Team

- **Transaction Systems:** Engineered high-reliability financial transaction validation services (Rust, Docker, and gRPC) in a high-load production environment
- **Resilience:** Designed and launched a Stand-In Processing backup system, reducing downtime and ensuring uninterrupted transaction flow during system outages
- **Performance:** Improved database query efficiency and microservice throughput via targeted query optimisation and performance tuning
- **Site Reliability Engineering:** Deployed services, resolved production incidents, and led post-mortems to strengthen platform resilience

Junior Software Engineer | Huawei Technologies

Full-time · Saint Petersburg, Russia

Mar 2020 – Oct 2021 (1y 8m)

Cloud Application Platform

- **Performance:** Enhanced system performance by 1.5x and reduced manual configuration effort by 5x through workflow automation
- **API Services:** Built a dynamic API publication service aggregating data from multiple databases and streaming sources (Java, Docker, Kubernetes)
- **Automation:** Designed tooling for Big Data pipeline configuration (Java, PostgreSQL, graph databases)
- **Low-Code Framework:** Introduced a project generation system to automate data query and processing pipelines, accelerating developer productivity
- **Mentorship:** Led and mentored two interns; established clear development practices and improved collaborative delivery

Education

Master of Computer Science | ITMO University

Programming and Artificial Intelligence · Saint Petersburg, Russia

Sep 2021 – Jun 2023

Bachelor of Computer Science | ITMO University

Applied Mathematics and Informatics · Saint Petersburg, Russia

Sep 2017 – Jun 2021

Conferences

Genetic and Evolutionary Computation Conference

Jul 2023

Empirical Analysis of Crossover-Based Evolutionary Algorithms on Rugged Landscape

Foundations of Genetic Algorithms Conference

Sep 2021

Analysis of Crossover-Based Algorithms on RealJump Functions

Summary

Software Engineer with 6 years of experience designing and scaling backend systems in Kotlin, Java, and Rust. Skilled in resilient architectures, high-load services, and leading cross-team technical initiatives. Focused on reliability, performance, and delivering production-ready solutions with measurable impact.

Skills

Development	Kotlin, Java, Rust, Spring Boot, REST API, gRPC, Gradle
Technologies	PostgreSQL, Kafka, AWS, Docker, Kubernetes, Git
Practices	CI/CD, Site Reliability, Shadow Testing, Cross-Team Rollouts
Soft Skills	Problem-solving, Adaptability, Teamwork, Mentorship, Initiative, Attention to Detail, Continuous Learning
Languages	English (proficient), German (intermediate), Swedish (elementary)
